This option reduces the risk of investing the full premium into a fund with a volatile NAV, by allowing premiums to be invested in a low risk fund “Preserver” and gradually transferring the money into chosen investment portfolio.

Policyholder can choose 6 or 12 month Auto Transfer Option to invest regular premiums. If the policyholder opts 12 month Auto Transfer Option, 1/12th of allocated premium will be invested in the chosen fund and the balance will be invested in the Preserver Fund. One month later 1/11th of the fund in the Preserver fund will be transferred to the chosen fund and this process will be continued until all the funds in the Preserver Fund are transferred. This process will be repeated as and when premium is received. When ATO is opted , partial withdrawal and switching between the funds is allowed except that the policyholder cannot switch from the existing funds to the preserver.

This option is available for the modes of yearly, half-yearly or quarterly without any charge. Policyholder can opt or cancel this option any time during the year .There is no restriction, but the selected option will become effective from the subsequent premiums.

- **Annual Premium Increase(API):**

API is option to increase premium by 5% from second year onwards. Policyholders can Opt\Cancel this option at anytime during the policy term. If the policyholder cancels this option, then the next annualized premium will be at the discretion of policy holder i.e. he can continue paying the same premium as the time of cancellation of this option or he can pay the annualized premium he has opted at the point of inception.

- **Top-up premium**

The policyholder has got an option to contribute in lump sum any time before the end of the policy term, to increase the number of units to his credit, if the policy is in force. However, such lump sum payment should be at least Rs.5, 000/- per payment.

- **Switching:**

The Policyholder can switch from one Fund to another Fund out of the funds mentioned above, or change the percentages of funds chosen earlier. The policyholder can switch two times in a year without any charge.

- **Revival**

If the policy lapses, by not paying all the due premiums, the policy can be revived within a revival period of 2 years from the date of first unpaid premium. During the revival period the policy administration charge will be collected by canceling the units and FMC will be charged by the adjustment of NAV. For reviving such a policy, arrears of premiums will be required to be paid. Out of this, premium allocation charge in respect of each year's premium will be deducted and the balance will be utilized to allocate units to the policyholder's unit account at the NAV prevailing at the time of revival. If the policyholder dies within the revival period, the value of the units on the date of death at the prevailing NAV will be paid. If the policy is not revived within the revival period, the value of the units at the prevailing NAV will be paid at the end of the 3rd year from the date of commencement of the policy or at the end of the revival period whichever is later with appropriate surrender charges and the policy terminates.
